Three-Site Comparison Brief

175 3rd Street · 70-33 260th Street · 47-07 Vernon Blvd · Generated 2026-01-01

Site Comparison

Metric	175 3rd Street	70-33 260th St	47-07 Vernon Blvd
KOANO verdict	ADVANCE (78)	ADVANCE (72)	HOLD (52)
Risk-adjusted rank	#1	#2	#3
Zoning district	M1-4/R7-2	R6	R6B
Base max floor area	415,528 sf	242,250 sf	7,500 sf
City of Yes affordable max	605,173 sf	323,000 sf	9,750 sf
Unused development rights	402,010 sf	167,793 sf	0 · built out
CD approval ratio	95%	95%	95%
Median filing timeline	567 d	362 d	531 d
Opportunity Zone	No	No	No
Adjacent block unused FAR	0 sf	144,498 sf	110,791 sf
Flood (SFHA)	X	X	AE · SFHA
Open HPD violations	0	3	1
Speculation watch	No	No	No
Permit activity (24mo)	312	96	41
Recorded sales $/sf	$1,156	$743	$612

Identical structure across all sites. Every row is present for every site.

Reasoning

Reasoning paragraph 1: applying the selection rule across the sites, 175 3rd Street leads on the magnitude of its development headroom and a favorable community-district entitlement record, weighed against a longer median filing timeline, while the remaining sites trade headroom against timeline and flood exposure. This is a screening comparison of public record, not a feasibility study, and carries no financial modelling.

Reasoning paragraph 2: applying the selection rule across the sites, 175 3rd Street leads on the magnitude of its development headroom and a favorable community-district entitlement record, weighed against a longer median filing timeline, while the remaining sites trade headroom against timeline and flood exposure. This is a screening comparison of public record, not a feasibility study, and carries no financial modelling.

Reasoning paragraph 3: applying the selection rule across the sites, 175 3rd Street leads on the magnitude of its development headroom and a favorable community-district entitlement record, weighed against a longer median filing timeline, while the remaining sites trade headroom against timeline and flood exposure. This is a screening comparison of public record, not a feasibility study, and carries no financial modelling.

Reasoning paragraph 4: applying the selection rule across the sites, 175 3rd Street leads on the magnitude of its development headroom and a favorable community-district entitlement record, weighed against a longer median filing timeline, while the remaining sites trade headroom against timeline and flood exposure. This is a screening comparison of public record, not a feasibility study, and carries no financial modelling.

Reasoning paragraph 5: applying the selection rule across the sites, 175 3rd Street leads on the magnitude of its development headroom and a favorable community-district entitlement record, weighed against a longer median filing timeline, while the remaining sites trade headroom against timeline and flood exposure. This is a screening comparison of public record, not a feasibility study, and carries no financial modelling.

Reasoning paragraph 6: applying the selection rule across the sites, 175 3rd Street leads on the magnitude of its development headroom and a favorable community-district entitlement record, weighed against a longer median filing timeline, while the remaining sites trade headroom against timeline and flood exposure. This is a screening comparison of public record, not a feasibility study, and carries no financial modelling.

Reasoning paragraph 7: applying the selection rule across the sites, 175 3rd Street leads on the magnitude of its development headroom and a favorable community-district entitlement record, weighed against a longer median filing timeline, while the remaining sites trade headroom against timeline and flood exposure. This is a screening comparison of public record, not a feasibility study, and carries no financial modelling.

Reasoning paragraph 8: applying the selection rule across the sites, 175 3rd Street leads on the magnitude of its development headroom and a favorable community-district entitlement record, weighed against a longer median filing timeline, while the remaining sites trade headroom against timeline and flood exposure. This is a screening comparison of public record, not a feasibility study, and carries no financial modelling.
