Pricing Recommendation Sheet

78 8 AVENUE, Brooklyn, NY, USA · Generated 2026-10-29

Recommended Price Band

The band below is per square foot of comparable recorded sales. No whole-building dollar value is printed for this subject; the reason is stated under the figures.

LOW (25TH PERCENTILE)	MIDPOINT (TRIMMED MEDIAN)	HIGH (75TH PERCENTILE)
$1,073/sq ft	**$1,308/sq ft**	**$1,778/sq ft**

No unit-comparable valuation available: this is a co-op (DOF building class D4), and recorded co-op sales carry no unit area in DOF data. Enter unit square footage or connect your MLS for a unit-level valuation.

Derivation: the 10 comparable recorded sales were reduced to their price per square foot. The 25th and 75th percentiles of that distribution ($1,073 and $1,778 per sq ft) set the low and high edges: the interquartile spread, the middle 50% of comparable sales, which deliberately excludes the cheapest and most expensive outliers on both ends. The trimmed median of the same pool ($1,308 per sq ft) sets the midpoint.

Local recorded-sale prices are rising, which the reviewer should weigh alongside the band.

How These Comparables Were Selected

To keep the selection defensible rather than cherry-picked, a fixed rule is applied to NYC DOF recorded sales. The analyst does not hand-pick the set:

• Residential recorded sales only (DOF building classes 01, 02, 03, 09, 10, 12, 13: one- to three-family homes, condos, co-ops).

• A trailing window of recent recorded sales, ranked by true distance from the subject (recorded sale -> PLUTO centroid), preferring the nearest.

• Sales with a recorded gross square footage (so a $/sq ft can be computed); sales without it are excluded.

• A trimmed median is used for the central figure to damp outliers.

Provider scope note: Comparables are recorded residential sales ranked by true distance from the subject (DOF sale -> PLUTO centroid), last 12 months. 105 within 1 mi. Condos/co-ops without recorded square footage are excluded, so comps skew to 1-3 family homes. NYC only.
